Re: MTD Registration with VDEQ for the Up-Flo® Filter

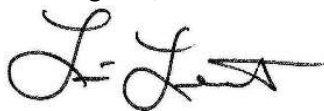

Dear Mr. Cooper:

Please accept the enclosed MTD Registration Document and binder of supporting documentation to register the Up-Flo® Filter as an approved BMP to remove up to 40% Phosphorus from stormwater runoff.

The Up-Flo® Filter has been independently tested in the laboratory and in the field, most recently according to the NJDEP-2009 version of the TARP Protocol. Please note that the final NJCAT verification of our TARP field testing study is not yet available although it is expected this month. A copy of the most recent draft report from NJCAT is enclosed in the supporting documentation for your consideration. Dick Magee, the Technical Director of NJCAT, can serve as a reference should you have any questions about the status of the final verification of the Up-Flo Filter TARP report. His email is [rsmagee@rcn.com](mailto:rsmagee@rcn.com) and his office phone is (201) 216-8081.

Please do not hesitate to contact me if you have any questions about the Up-Flo® Filter or the technical documentation contained within this submission. We truly appreciate the opportunity to market the Up-Flo® Filter in Virginia.

Kind regards,

Lisa Lemont, CPSWQ  
Business Development Manager
