Subject: BaySaver Technologies Submittal for Bayseparator and Bayfilter Technologies

Dear Mr. Cooper:

Thank you for affording BaySaver Technologies the opportunity to be considered for the Virginia BMP Clearinghouse.

Enclosed are the summary documents (Manufactured Treatment Device (MTD) Registration files) and the supporting articles of information on both technologies. We have included our Technology Evaluation Report (TER) for Washington State Department of Ecology, which is under review by Ecology. We will forward you our formal acceptance once we receive notice and are listed on their website with our other Ecology designations.

The primary information we have submitted for your analysis for the Bayseparator and the Bayfilter are the NJCAT/DEP testing and the Richard Montgomery High School (RMHS) data packets, respectively.

Feel free to contact me and discuss this further. We look forward to being included in the Clearinghouse for both technologies.

Sincerely,

A handwritten signature in black ink that reads "Brian M. Rustia".

Brian M. Rustia, PE
Eastern District Manager, Bayfilter Technologies, LLC / ADS
